AUTONOMOUS SOLUTIONS, INC. (ASI)

About Us

What We Do

ASI, worldwide leader of industrial vehicle automation, developed Mobius® autonomous fleet management system. ASI's innovative safety robotic hardware and software makes any fleet, large and small, entirely autonomous. Trusted by global Fortune 500 companies across various sectors, ASI transforms the dirty, dull, and dangerous into efficient, scalable, accurate, and reliably productive operations.

Mission, Vision, and Values

Our partnering model

ATTENTION TO DETAIL

Our emphasis on the importance of every individual's contribution

GROWTH

Our personal and company mission

HUMILITY

The vital intercharacter trait that maximizes the realization of all the other

ASI MISSION:

To help you reach your potential through innovative robotic solutions.

About Us

Mobius®

Mobius is a powerful, OEM-agnostic fleet management system. ASI's best-in-class platform approach is adaptable to customers' needs, from full automation to remotely controlled steering, transmission, acceleration, braking, and ignition. With Mobius, a single user can control multiple vehicles simultaneously under the most challenging conditions and from thousands of miles away.

Heavy Construction

Mobius provides critical advantages as a fleet management system for your heavy construction site. Mobius receives dispatch information and communicates with an autonomous fleet, which can be mixed with autonomous construction ADTs, conventional haul trucks, tele-op and remote-control dozers, and excavators.

Logistics

Effective yard management is a complex topic in today's ever-evolving supply chain. Poor planning can lead to extensive fees or charges. Warehouse managers struggle with maintaining visibility and control over trucks, personnel, and assets in their yards. ASI Logistics can help warehouse managers overcome these challenges with comprehensive automation.

Agriculture

ASI's autonomous farming solutions help growers scale operations, solve labor gaps, and work around the clock with precision. From broad-acre fields to complex orchards, our systems retrofit existing vehicles to operate safely and efficiently without a driver.

We work closely with top agriculture partners to bring automation to the field. Whether optimizing for cost, safety, or sustainability, ASI helps farming operations grow smarter and more productive.

Landscaping

ASI Landscaping, such as robotic mowers and other automated tools, increases efficiency, reduces labor costs, improves workforce safety, and optimizes precision. ASI Landscaping is the solution for those facing labor shortage issues in a green space competitive environment.

Autonomy at the Human Level

ASI takes immense pride in the talented individuals who bring the mission to life. ASI is on a journey to automate the dull, dirty, and dangerous jobs of the world, and its exceptional team is at the heart of this transformation.

TM

By developing and deploying cutting-edge autonomous solutions globally, ASI is reshaping industries and improving lives. Getting to work with robots and being recognized as a “Great Place to Work” are pretty cool. ASI is an excellent organization for those who value innovation, foster personal and career growth, and wish to make a global impact on cutting-edge robotic technology.

Leading indicators based on staff surveys are:

- 96% of ASI believe People care about each other here.
- 95% of ASI believe Management would lay people off only as a last resort.
- 94% of ASI believe People can take time off from work when necessary.
- 94% of ASI believe When you join the company, you feel welcomed.
- 92% of ASI believe People here are willing to give extra to get the job done.

Inside ASI: Employee Stories

“My favorite part about working at ASI is knowing my input matters — not just as a manager, but from Day One. As an intern doing manual testing, I could reach out to anyone, share suggestions, and ask questions. My feedback was always valued and acted upon. I quickly realized that while ASI helps me grow, I also help ASI grow. It’s not only a ‘People-Building Robot Company’ — it’s a ‘Robot Company Built by People’, where everyone sees their impact.”

McKay Colleni
Software Engineer

“My favorite part about working at ASI is being surrounded by people who are passionate and motivated to make a difference in the world. Not to mention the great benefits we have too.”

Kambree Leishman
Software QA Analyst

“Working at ASI has been an incredible experience. The leadership team genuinely invests in our growth, providing the tools and support to succeed. I love being part of a high-tech company that pushes boundaries and embraces innovation. Every day brings new challenges, making my role both extremely exciting and fulfilling.”

Doug Taylor
Logistic Business Unit Leader

“What I appreciate most about ASI is how much they invest in their people. I started as an intern four years ago, and because of their focus on promoting from within, I’ve been able to grow my career in ways I never imagined. The supportive culture here makes it a place where you feel encouraged to take on new challenges and truly succeed.”

Brooke Larsen
Marketing Manager
